Reasons for Allowance

Allowable Subject Matter

1. Claims 1-2 are allowed.
2. The following is an Examiner's statement of reasons for allowance:
claims 1-2 recite novel features of a method for encoding a sequence of video data according to a process, wherein the data consists of I-VOPs, P-VOPs, B-VOPs, coded using a motion compensated prediction from past and future reference VOPs, and the encoding method includes a coding step of each VOP and before the coding step, a motion estimation step being performed between the current VOP and the previous one, wherein the motion estimation step itself comprises a decision process concerning the type of VOP to be coded and based on the sub-steps of:
carrying out a motion estimation between a VOP number N (VOP N) and the previous one (VOP N-1);
on the basis of the motion estimation, computing a so-called coherence factor, provided for quantifying the sequence motion;
on the basis of a comparison of the coherence factor with a predetermined threshold, taking a final decision on the type of the current VOP, the current VOP being a B-VOP or not according to the value of the coherence factor with respect to the threshold.

The art of record fails to anticipate or make obvious novel features (*emphasis added on underlined claim limitations*) as specified in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

A) Moon et al (6,035,070), Encoder/decoder for coding/decoding grey scale shape data and method thereof.

B) Takenaka (6,914,937 B2), Image control apparatus.
